## To connect an XLR cable

**1** To hold the M5D in one hand and your 3-pin XLR cable in the other, align the slot on the XLR cable to the groove on the inside of M5D body and insert. Ensure that the XLR cable 'clicks' into place so that it can not be removed unless the release latch is used.

**2** Please ensure the XLR cable you are using is wired correctly to match the output pins on the M5D. You may of course use XLR-XLR, XLR-jack, or XLR-mini jack plugs depending on your relevant input socket.
